QuickBooks Online Advanced key benefits

Real-time data

- **Collaborate from anywhere:** Make your teams as productive as possible with cloud collaboration, and see updated work in real time.[1]

- **Manage what others can see and do:** Get your team into QuickBooks securely with custom roles and permissions.[1]

- **Track business performance at a glance:** Make informed business decisions and get the insights you need most with customizable, presentation-ready reports.

- **Automatically sync your spreadsheets:** Seamlessly send data back and forth between QuickBooks Online Advanced and Excel for more accurate business data and custom insights.[1]

Boost productivity & automate workflows

- **Do less manual work:** Import and send hundreds of invoices and expenses at once. Enter and edit multiple bills and checks in a few quick steps.

- **Save time with automated workflows:** Make cash flow more efficient by creating automated reminders and approvals based on your own rules.

Flexibility to make it your own

- **Work your way with Premium Apps:** Customize how you work with your pick of seamless app integrations built just for QuickBooks Online Advanced.[1]

- **Tools that grow with your business:** Access an ecosystem of business tools. Do everything from managing your money to paying your team with QuickBooks.

- **Room to grow without added cost:** With up to 25 users and unlimited charts of accounts, QuickBooks Online Advanced grows with you.[1]

- **Add big-business features for a small-business budget:** Payroll, employee benefits, checking accounts, payments, and business insurance.

Online backup & restore

- **Back up your books:** QuickBooks frequently saves your data in the background. If needed, you can easily restore your books to a specific point in time.[1]

QuickBooks Enterprise key benefits

The most customizable reporting

- **Deeper insights mean better decisions:** See the most actionable data for your business, and build your own report from any data set.

- **More than 200 built-in reports:** including 70 industry-specific reports.

- **See what's making money:** Clearly see your profits and losses by project or job, so you can pivot where needed.

- **Track details unique to your business:** Search, sort, and filter information your way with enhanced custom fields.

- **Keep projects within budget:** Real-time job costing helps you make sure every project stays on track.

Robust inventory management[2]

- **Manage inventory with confidence:** Track inventory across warehouses right down to the specific bin or pallet.

- **Monitor sales orders at a glance:** Use one dashboard to manage sales orders and track inventory across locations.

- **Manage online sales and inventory in one place:** Integrate e-commerce platforms to automatically sync data, save time, and reduce errors.

Automated pricing[2]

- **Set flexible pricing rules:** Create a pricing strategy by setting rules for markups and discounts by quantity, season, customer group, manufacturer, or holiday.

- **Total control:** Automate your pricing, with the power and flexibility to make exceptions as needed.

- **Maintain your margins:** Automated pricing rules help ensure you're making what you want to make on each transaction.

- **Save time on sales tax:** Reduce manual mistakes when you automatically apply city-specific sales tax on every invoice, sales order, and receipt.
